About Us

Katlego Security Services is a PROUDLY SOUTH AFRICAN small business entity. The current members have vast business experience in the private sector and within the security industry.

OUR VISION

To contribute towards developing and legitimizing the industry by upholding the principles of Broad Based Black Economic Empowerment and maintaining high standards and training to maximize and prosper in the transfer of skills.

Katlego Security Services (Pty) LTD is a PROUDLY SOUTH AFRICAN small business entity.

OUR MISSION

To support our client's business objectives by safeguarding their employees and assets, by assuring the continued delivery of value-added quality services.

OUR VALUES

- We are committed to long term partnerships achieved by building relationships with our client.
- We believe in high standards and integrity.
- We are committed to our partnerships and mutual return on investments
- We believe that the continued delivery of effective security services should be assured through security risk management principles, continued involvement of our stakeholders and understanding the unique requirements of each client.

Our objective is to ensure that the security personnel are familiar with all aspects of the client's operation.

To achieve this, a competency test is initiated as a benchmark process.

OUR SERVICES

GUARDING

This has been our core business with years of experience – specializing in all security disciplines viz:

- Industrial
- Commercial
- Residential areas and building
- Petro Chemical
- National Key Points
- Hotels
- Distribution
- Casinos
- Mining Industry
- Education

We are aware that many security companies offer the same range of guarding services, however Katlego Security differs itself by offering the specialized pro-active security by combining technology with intelligence based security, which includes covert and overt intelligence operatives.

TECHNOLOGY

Katlego Security Services has aligned itself with qualified associates to offer a comprehensive integrated solutions approach to security needs of today. These range from a full spectrum of hardware and software related technology to meet specific requirements and applications for forensic investigative capabilities to counter the challenges of white collar and syndicate crime in the workplace.

When necessary digital cameras, access control and monitoring devices are installed at strategic points. Not only does it allow our control room to dial into the cameras in order to monitor what is happening at the site, but also allows us to check that the guards are completing their allocated patrols on time, every time.

INVESTIGATIONS

Our management have in excess of 25 years' experience in the industry and related services. In addition, we have established a preferred working relationship with a reputable investigation company, which has an impressive track record and a balanced infrastructure that includes senior forensic investigative skills.

Our investigation division interacts continuously with various law enforcement agencies in order to determine trends and crime hot spot areas.

CROWD CONTROL

- 1 We can supply wired trailers to corner off at least 120m per trailer that can be deployed anywhere in SA.
- 2 Trained personnel to do crowd control with all necessary equipment and PPE.

ROAD SAFETY

- Traffic Monitoring
- Vehicle inspections
- K53 Driving Evaluation
- Traffic Control
- Road blocks / Campaigns
- Escort of Abnormal Vehicles
- Incident / Accident Assessments

CLOSE PROTECTION/ CONFLICT RESOLUTION

Katlego Security Services considers this to be part of its core business and therefore has a direct association with members who have served many years in this field. They have local, national and international experience in providing a professional service. Past clients include Government Ministers, international groups, celebrities, media and radio personalities, concerts, events, companies and individuals.

POLYGRAPHS

- 1 Pre-employment screenings
- 2 Integrity
- 3 Case Specific / Investigation

INTELLIGENCE OPERATIONS

- 1 Collection of information
- 2 Processing of information
- 3 Follow up operations with SAPS

EMERGENCY PREPAREDNESS

Consisting of, but not limited to:

- Emergency COP and Baseline Risk Assessments
- Emergency Audits:
 - Control Room
 - First Aid
 - Emergency JOC
 - Training
- Compliance Training
- Documents Control
- Emergency Evacuation Plans (Surface and Underground)
- Emergency Warden Appointments
- Fire and First Aid Equipment compliance and monitoring
- Safety Discussions and Talk Topics
- Simulation Training and Major Scenarios
- Road Safety Management
- Setting up of an Emergency Call Centre and what it entails

Security personnel assigned to any project will be selected on a balance of ability, skills and conduct that the best fits the client' requirements.

TRAINING

On site training are conducted on a regular basis.

PSIRA ACCREDITED

All guards received PSIRA accredited training, in order to be PSIRA registered.

FIRST AID TRAINING

A number of employees have level 1 first aid training. All members attend refresher courses when necessary.

FIREFIGHTING SKILLS

Core members are trained in basic firefighting skills.

FIREARM COMPETENCY

In order to be issued a fire arm, members must be in possession of a valid SAPS firearm competency certificate for the necessary weapon.

When issued a weapon, all members must do a Reg 21 shoot once a year.

ROAD SAFETY

Road safety and pedestrian safety.

ORGANOGRAM

RESOLUTION OF MEMBERS

The Katlego philosophy is to provide services that meet the ever-changing requirements of business and organizations, always taking global business trends into consideration.

The company is managed in terms of a highly progressive philosophy simply described as "continually appraising and adapting our operation to deliver innovative and flexible security solutions".

OPERATIONAL APPROACH

Before concluding a security contract with any company, Katlego will undertake a site inspection and risk assessment. In conjunction with our client, we would develop a pro-active strategy to secure the premises and address the client's specific needs particularly with regards to risk and site procedures.

Due to the fact that every site requires a unique security formula, we have a wide range of specialist who assess the various risk areas. The result of the site inspection / risk assessment will be incorporated in a comprehensive induction manual and site standing instructions. This will be made available to the client. All security personnel will be trained and inducted accordingly.

OPERATIONAL OBJECTIVES

We support the principal of “MANAGEMENT BY OBJECTIVE” to determine set objectives and standards when measuring performance. This is determined by mutual agreement and adhered to the performance standard, which thereafter will be accepted as the norm. In this regard, a holistic approach is achieved with the emphasis in the entire service.

The client may adjust the standards at any given time to comply with their objectives.

We adhere to the above so as to maintain our professional and competitive advantage in the Educational, Higher Educational institutes and affiliates and to render a service that not only meets with but exceeds our client’s expectations.

It is our objective to supply a stable team that projects the right image. This will be achieved by implementing the 4 pillars of Operational Security Principle:

What is the role security must fulfil. It is well defined and marketed to all roll players and stakeholders.

Clear Security Programs
Strategy
Scope
Mandate

Clear Internal Control
Command
Control
Responsibility

Who is clearly responsible and at what level?
Security must have access to the highest and lowest level of any organization.

In time performance measures of compliance standards and procedures

Supervision / Management Compliance
Inspect what you expect

Site Instructions
Procedures
No Grey Areas

What is needed and what needs to be done must be clearly promulgated in work guidelines.
